REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art fails to teach a combination of all the limitations as claimed in the independent claim 6, wherein the claimed invention comprising a stimulator for illuminating the retinal region of the rear surface of an eyeball including the macular area with a visible flash light to stimulate a retinal function including an optic disk's function; and a calculator for detecting the change of the retinal function of the retinal region from the images A, B before and after the stimulation, wherein the calculator has an image processing program for registering the images A, B before and after the stimulation in advance and subsequently displaying the retinal function with an image from the registered images by using a computer, as claimed. The prior art also fails to disclose a combination of all the limitations as claimed in the independent claim, wherein the claimed invention comprising the limitations in the method claim as claimed in claim 1 wherein the method for optical imaging of retinal function including an optical disk's function comprising the steps of illuminating observing, stimulating, imaging, and calculating wherein, in the calculating step, the images A, B before and after the stimulation are registered in advance and the change of the retinal function is displayed with an image from the registered images, as claimed. The prior art does not disclose or fairly suggest, either alone or in combining with any other reference, to meet a combination of all the limitations as claimed in claims 1 and 6 either under 35 USC 102 or 103. Therefore claims 1-9 could be allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
